ORACLE eCOMMERCE INTEGRATION

Transom utilizes a systems approach to maximize the potential of our client's eCommerce environment. Our best in class commerce integrations result in exceptional performance for our clients. Our solutions allow B2C and B2B clients to strategically align and satisfy their customer's needs. Transom has the Oracle Commerce Platform experience!

FRAUD PROTECTION

Sift's data driven insights lead to the ultimate in trust and safety. Our Sift integration will increase security and maximize revenue by reducing chargebacks, guarding against fake account creation or account takeover, and strengthening promo abuse protection.

MESSAGING

Using Twilio and Bandwidth, leaders in communications services, Transom significantly enhances our client's engagement platform by integrating SMS, voice, video, WhatsApp, Facebook, and IM. Our approach will allow you to interact with your customers the way they want to communicate, resulting in more engaged and happier consumers.

PERFORMANCE

The Oracle Commerce platform is built for scalability and performance but can be limited by unanticipated bottlenecks, preventing you from taking full advantage of the platform's environment. Transom's tuning experience and expertise allows us to identify issues in advance and optimize your performance.
